EDUCATION

San Diego State University — M.S. in Geography (Concentration in GISciences) May 2026
DePaul University — Graduate Certificate in Geographic Information Systems June 2024
Loyola University Chicago — B.A. in Political Science, cum laude May 2023

EXPERIENCE

San Diego Padres

Ticket Service Representative

San Diego, CA

Jan. 2025 – Present

- Managed a shared portfolio of ~2,000 season ticket member accounts, coordinating with the Blue Service Team to track milestones and ensure consistent service delivery.
- Provided technical support and troubleshooting for ticketing systems, acting as the primary point-of-contact to resolve client inquiries and maintain service standards.
- Maintained data integrity within the CRM by documenting account updates and verifying record accuracy, applying rigorous quality control to ensure data consistency.

Center for Open Geographical Science

Graduate Researcher

San Diego State University

Aug. 2024 – May 2026

- Built reproducible Python pipelines to clean, standardize, and validate large-scale U.S. precinct election datasets for collaborative spatial analysis.
- Conducted spatial data analysis of U.S. precinct-level voting patterns using open source packages to identify geographic electoral polarization trends.
- Provided feedback to multi-author academic papers and reviewed code within the center to broaden understanding of spatial analysis across social sciences research.

MacLean Collection

Collections Intern

Lake Bluff, IL

May 2023 – Apr. 2024

- Maintained accurate collection records in Vernon CMS through cataloging and physical organization projects.
- Applied archival handling techniques to digitize fragile maps and books across a 400,000-piece collection.
- Evaluated diverse historical maps to verify metadata, gaining a foundational grasp for cartographic design.

SELECTED PROJECTS

From Distribution to a Map... - [ProQuest](#) - M.S. Thesis

Aug. 2025 – May 2026

- Analyzed ~700,000 electoral precinct geometries to quantify spatial polarization based on median Democratic vote share across national and local scales.
- Drafted results in LaTeX, translating complex spatial statistics into a clear narrative supported by visualizations.

GerrySD - [Open-Source Local Redistricting Platform](#)

Sep. 2025 – Dec. 2025

- Developed a spatial analysis workflow to interpolate 2024 precinct vote totals into Census boundaries, ensuring data consistency for local redistricting analysis.
- Built an interactive web-mapping tool utilizing p5.js, Leaflet, and Turf.js, allowing citizens to draw, assess, and export legislative boundaries as GeoJSON files.

606 Bloomingdale Trail Digital Map - [GIS Phenology Project](#)

Jan. 2024 - May 2024

- Designed and deployed field data collection workflows using ArcGIS Field Maps and Survey123 to capture precise GNSS tree coordinates along a Chicago rails-to-trails park.
- Developed a public-facing Esri StoryMap to facilitate a citizen-science phenology project, enabling community volunteers to track urban biodiversity and bloom cycles over time.

TECHNICAL SKILLS

Programming & Data Analysis: Python (Pandas, GeoPandas, PySAL), R, JavaScript (p5.js), Git/GitHub, Jupyter Notebooks

Spatial & Data Governance: ArcGIS Pro, ArcGIS Online, data cleaning, QA/QC documentation, and building reproducible, transparent, and shareable spatial workflows. .

Tools & Systems: Google Workspace, Tableau, CRM systems, LaTeX, Adobe Illustrator
